AirGoggle™ NVC910 Dual CCD All Weather Network Day/Night Camera

The AirGoggle NVC 910 is an all-in-one high performance professional network speed dome color day night camera. It offers full D1 video resolution and efficient network real-time streaming via MPEG-4 video technology. Built in synchronized audio is software selectable. The embedded web server allows camera access across the network using standard web browser. Event driven recording option via video motion detection or single external sensor inputs allows pre-alarm video images sent via email or FTP and pan, tilt, and zoom the camera to 1 of 165 preset locations. The NVC 910 camera is the industry's most silent and reliable pan, tilt, zoom camera. The NVC 910 boast a 100X zoom (10X optical & 10x digital). True day and night utilizing ICR removable filter is standard with the NVC910 series camera. Rugged mechanical design and IP66 weatherproofing along with host of convenient features makes the high-performance AirGoggle NVC910 camera ideal for professional security surveillance applications.
